"PAMM" Keyers - Trip Report

25X1A5a1

1. General - A short visit was made to [REDACTED] Inc., Chicago, Illinois, on Friday, 7 February 1958, when in the area on other business. Business concerned a proposal for the fabrication of 10 re-designed "PAMM" keyers and a clarification of a proposal for a "Magnetic PAMM" submitted by [REDACTED] Inc. Present were:

25X1A5a1

25X1A5a1

Mr. [REDACTED] President

25X1A9a

Mr. [REDACTED] R+D-EP

25X1A5a1

2. Proposal - [REDACTED] had been asked to prepare a proposal for the fabrication of ten modified "PAMM" keyers. The proposal was available and after some discussion certain paragraphs were rewritten for clarification. It was noted that the unit cost was increased from \$3,333.00 (for a quantity of 6) to \$3,586.06 (for a quantity of 10). The proposal contained no reference to tooling and Mr. [REDACTED] explained that he had offered the [REDACTED] \$75.00 for the hand fabricating tooling and had received phone advice that the offer would be accepted.

3. Magnetic PAMM Proposal - The proposal for the development of a Magnetic PAMM on file in R+D-EP describes the development of a coder and keyer. However, under Phase B, of the proposal which considers the actual work, the contractor refers to the coder only. [REDACTED] said it was the company's intention to provide a keyer as well as the coder and authorized the insertion of "and keyer" to Phase B.

25X1A5a1

4. Correspondence has gone forward for the fabrication of 10 "PAMM" keyers.
